The final year students will be sent to different Health Ministry industries around the world which will include: Community Health Outreach, Sanitariums /Wellness Centers, Health Ministry Restaurants, Health Food Production industries etc.

G. All female Health Ministry Majors must take midwifery classes offered a week prior to the start of the first term

Summary of Hours: MajorHours44,General EducationCore62,Internship/  
CurricularPracticalTraining48,Vocational Training36,EvangelisticMinistries  
9.Total Hours:199.\*

**BiOl 124,125 Anatomy And Physiology I, II (4 credits)** This course is a detailed study of the structure and function of tissues, organs, and systems of the human body. Body systems are studied. The aim is to give each student an appreciation for the creative power and wisdom of God and a basic working knowledge of the human body.

**HlMn 110 Massage (4 credits)** This practical course in Swedish massage includes oral instruction, classroom demonstrations, and hands-on laboratory practice. A prior knowledge of bone and muscular anatomy is required. Students completing this class will have obtained a competency in the application of massage for the improve- ment of health. (Prerequisite: BIOL 124, or permission of the instructor.)

**HlMn 130 Principles Of Medical Ministry (4 credits)** A study of God's natural laws and general physiology as they relate to health. Students will study God's counsel regarding these laws in the Bible, the Spirit of Prophecy, and scientific

literature which is consistent with Inspiration. Lecture and practical experience will also be provided for CPR, first aid, and herbal and charcoal home remedies.

**Hlmm 144 PHYSIOLOGY OF Hydrotherapy (4 credits)** A physiological and practical approach to the understanding and use of hydrotherapy as a God-ordained treatment modality and a study of how water of varying temperatures and in various states effects changes in nervous, circulatory, and muscular systems. (Prerequisite: HLMN 130 or per- mission of the instructor.)

**Hlmm 337 Infectious Disease Management (4 credits)** A study of the common communicable diseases from such agents as viruses, bacteria, protozoa, and parasites. Focus will be on a person's predisposition and susceptibility to the disease-causing agent, as well as heaven's approved approach to educating and caring for the sick. Diseases discussed will include various infections, cancer, and AIDS. Laboratory experience is incorporated. (Prerequisites: BIOL 124 and 125 or equivalent, or permission of the instructor.)

**Hlmm 339 Chronic Disease Management (3 credits)** An etiological and pathological look at such chronic degenerative diseases as diabetes, hypertension, obesity, and cardiac disease. An emphasis will be placed on how adherence to God's plan of health can prevent disease and restore health. (Prerequisites: BIOL 124 and 125 or permission of the instructor.)

**Hlmm 340 Health And Disease Assessment (4 credits)** A head-to-toe detailed review of body systems and how God designed them to function normally, with an emphasis on developing assessment skills for conducting patient histories and physicals. Methods of evaluation will be discussed and rehearsed in class. (Prerequisites: BIOL 124 and 125 or equivalent, or permission of the instructor.)

**Hlmm 350 Therapeutic Massage (4 credits)** This advanced practical course in massage includes oral instruction, demonstrations, and hands-on laboratory practice. A prior knowledge of Swedish full-body massage is required. Students completing this class will be competent in specialized therapeutic techniques for specific ailments or dysfunctions. (Prerequisite: HLMN110or equivalent,or permission of the instructor.)

**Hlmm380 Introduction To Herbal Pharmacology (3 credits)** This is a detailed study of simple medicinal herbs. Students will review God's counsels and scientific literature on herbal medicine with regard to the use of these natural resources as part of a NEWSTART program to prevent and remedy diseases. Students will also be introduced to the language of medicine, for better understanding and more accurate communication with medical personnel.

**Hlmn 481,482,483 Internship I, II, III (48 credits)** Three consecutive terms in which to utilize and further develop skills learned at Hartland College. Sites are subject to the approval of the Curriculum Committee.

A 12-credit curricular practical training course is offered as an elective. The course, which counts toward the total credit hours for graduation, offers students an opportunity to apply the theories they have learned in the Christian Health Ministries Department. The instructor is appointed by the department chair, and grading is on a pass/fail basis. The instructor, along with the department chair, will choose an appropriate site and work closely with the fieldwork supervisor, who will submit an evaluation at the end of the assignment. This course is open to all students who have completed three terms at Hartland College.

**NUTM 201 Foods And Nutrition (3 credits)** A comprehensive course in the basic principles of human nutrition and food selection according to God-centered principles. A study of scriptural counsel regarding diet will be carefully pursued. (Prerequisites: HLMN 130, BIOL 124 and 125 or equivalent, or permission of the instructor.)

**NUTM302 Preventative And Therapeutic Nutrition (3 credits)** The focus of this course is to teach wise selections of food to minimize one's risk for developing disease. Nutrition is also presented as a therapeutic mode to promote health in the presence of various diseases, including the effects of nutrients on the causes and symptoms of illness. (Prerequisites: BIOL 124 and 125 and NUTM 201, or permission of the instructor.)
